| | |
|------------------------------|---|
| bs_add_biscuits | 2 |
| bs_blank_target | 2 |
| bs_details_expand | 2 |
| bs_embed_comment | 3 |
| bs_embed_tweet | 3 |
| bs_embed_url | 3 |
| bs_img_accessible | 3 |
| bs_make_link | 4 |
| bs_named_anchor | 4 |
| bs_session_details | 4 |

Index**5**

| | |
|-----------------|---------------------------------------|
| bs_add_biscuits | <i>Add Closing Paren Labels [WIP]</i> |
|-----------------|---------------------------------------|

Description

In development. Adds comments after closing parentheses in your selection with the name of the function being closed (sometimes called 'biscuits'). Warning: also styles the file. Please check the output.

Usage

```
bs_add_biscuits()
```

| | |
|-----------------|----------------------------------|
| bs_blank_target | <i>Add Blank Target to Links</i> |
|-----------------|----------------------------------|

Description

In selected text, append {target='_blank'} to all links that are in the form []().

Usage

```
bs_blank_target()
```

| | |
|-------------------|-----------------------|
| bs_details_expand | <i>Insert Details</i> |
|-------------------|-----------------------|

Description

Inserts at the cursor position an expandable HTML details block.

Usage

```
bs_details_expand()
```

| | |
|------------------|------------------------------------|
| bs_embed_comment | <i>Insert knitr comment engine</i> |
|------------------|------------------------------------|

Description

Modify the selected text into the knitr comment engine. As described [here](#).

Usage

```
bs_embed_comment()
```

| | |
|----------------|--------------------|
| bs_embed_tweet | <i>Embed Tweet</i> |
|----------------|--------------------|

Description

Replace a Twitter shortcode with a chunk that contains code to embed the tweet. Also names the chunk after the shortcode.

Usage

```
bs_embed_tweet()
```

| | |
|--------------|------------------|
| bs_embed_url | <i>Embed URL</i> |
|--------------|------------------|

Description

Modify the selected text or URL into the form `{% embed url=' ' caption=' ' %}`.

Usage

```
bs_embed_url()
```

| | |
|-------------------|--------------------------------|
| bs_img_accessible | <i>Insert Accessible Image</i> |
|-------------------|--------------------------------|

Description

Inserts at the cursor position some HTML image code that has caption and alt text elements.

Usage

```
bs_img_accessible()
```

| | |
|--------------|-----------------------|
| bs_make_link | <i>Make Into Link</i> |
|--------------|-----------------------|

Description

Modify the selected text or URL into the form `[](){target='_blank'}`. Thanks to [Emil Hvitfeldt's blog post](#) for guidance.

Usage

```
bs_make_link()
```

| | |
|-----------------|-------------------------|
| bs_named_anchor | <i>Add Named Anchor</i> |
|-----------------|-------------------------|

Description

Add a named anchor to the selected text, generating a hyphenated tag in the process. Remember to add `'#anchor-tag'` to where your anchoring to.

Usage

```
bs_named_anchor()
```

| | |
|--------------------|-------------------------------|
| bs_session_details | <i>Insert Session Details</i> |
|--------------------|-------------------------------|

Description

Inserts at the cursor position an expandable HTML details block that contains the date of the last update and session information.

Usage

```
bs_session_details()
```
